Screen Printing Machine For Automotive Filter

Automotive Filter is one of the important auto parts, many manufacturers filter device suppliers are considering screen printing to their products. Because the basic car specifications standardized filter device, the screen printing technology is also mature.

1) The 250AB Cylinder screen printer;
2) The marabu screen printing inks;
3) Using 35 * 5mm squeegee.

Most filter uses single color printing, but there are users using two-color screen prining , filter device itself has no anchor, must make a special fixture to complete the second chromatic color.
