Thermal Transfer Process of The Square For The PP Hollow Plastic Oil Bottles

We completed the square for the PP hollow plastic oil bottles thermal transfer process.Most users use stickers to complete such a way the decorative bottles, stickers existing letterpress printing or flexographic printing press, and then cut by the cutting machine into various shapes paste, the equipment investment amounted to about 10-20 million.

Heat transfer process is relatively lower investment process is relatively simple.

1) Inflatable Heat Transfer Machine;

2) Production specifically for inflatable fixtures, fixtures in the quality of decision bottles play a decisive role in the transfer.

3) PP material for the production of thermal transfer film.

Inflation pressure in the bottles because the instability of the thermal transfer in the quality of bottles to be further improved.
