All of your own digital portrait, company logo, factory picture or scenic can be printed onto the products, which makes your product look really different and special.

A heat press is the machine that presses a transfer onto an imprintable substrate. Using high temperatures and pressures for a certain amount of time, the transfer is permanently embedded into the product.

Heat presses are recommended for professional and satisfying results simply because standard laminating devices and home hand irons can not get even near the temperatures required for a reliable transfer.
